

```
import random

a = random.randint(0,999)

print(a)

if a % 2 == 0:
    print("the number is even")
else:
    print("the number is odd")

if a % 10 == 0:
    print("the number multiple of 10")
else:
    print("the number is not a multiple of 10")
```
