```python
def create_array(array,b,c):
    res=[]
    for element in array:
        if element >=b:
            if element <=c:
                continue
        res.append (element)
    return res
array = [2,1,0,-1,3,4,-2,4]
print (create_array(array,1,3))
```
